

# AUXILIARY RO TANK KIT

The RO Tank Kit consists of:

- ① storage tank,
  - ② tank shutoff valve,
  - ③ tubing, 3/8" x 20',
  - ④ tee fitting,
- and Teflon™ tape (not shown).

Connect to an RO system, as typically shown at right. If the RO system was previously installed, be sure to turn off water to the RO and open the product water faucet to relieve pressure. Use about 2 turns of Teflon™ tape on the threads of the tank top fitting before installing the shutoff valve. Be sure to tighten all tubing connections.
